~~Just wanted to
be sure to mention +
say in my letter~~

Dear Senator Nelson:

I am only 12 years old and was planning to live a little longer, but with all this pollution in our world I'm not sure if I'm going to make it.

Take for instance air pollution. It's bad enough now & who knows maybe by the year 1990 it might be so bad we may have to wear masks to get clean air.

What about our water in years to come? If the water gets to bad we might die of thirst & if we don't die of thirst we will probably die of suffocation.

Also our land we're destroying good land for crops & for auto grave yards. We American's

aren't the only living thing
on earth, what about the
birds & other animals? If
they die what are we going
to eat? I'm sure God didn't
make this world just so it
could be polluted. Isn't there
anything you or us can do
so that we will have a
cleaner & better tomorrow?
Thank-you for your time.

An ecology freak,
Karen
